We thank Jennifer Robinson for assistance with patient identification from the International Long QT Syndrome Registry; Sabrina Geoffrion, Marla Jirak, and Gini Roberts for study coordination; Katherine Armstrong, Marcia Willis, Wendy Brittain, Paula Beerman, and Martha Hoxley for home visit data collection; Rahul Raguram, Hemant Arora, and Guruprasad Rajaraman for data processing; Mark Andrews for database management; and Carolyn Fort for assistance with regulatory matters—all of whom received compensation. We also thank Arthur Moss, Wojciech Zareba, and Derick Peterson for their contributions to the design and execution of the study as a whole.
